**Central New York Association of Professional
Geologists presents:**

2010 Spring Symposium

The day will cover a range of remediation topics featuring post-remediation monitoring. Experienced remediation professionals will speak about data collection and evaluation techniques to demonstrate the effectiveness of monitored natural attenuation and in-situ remediation. A Poster session will compliment the presentations by speakers.

The day will begin with a social hour breakfast, followed by morning and afternoon speaker sessions. Lunch will be provided between the morning and afternoon sessions.

More information will be forthcoming.
